## Breast Cancer Screening and Diagnosis in 2022

Approximately 287,850 women will be diagnosed with invasive breast cancer in 2022, according to the American Cancer Society. Fortunately, we now have more sophisticated screening tools, like 3D mammography, screening breast ultrasound, and screening breast MRI to better detect breast cancer earlier.

Join us for a free webinar with Dr. Sonja Cerra-Gilch, division head of Breast Imaging and Intervention Radiology Affiliates Imaging at Radiology Partners, who will discuss current screening guidelines for the most common types of breast cancer. Dr. Cerra-Gilch also will discuss in detail screening options, like 3D mammography, ultrasound and MRI, that are now available to women.

## VIRTUAL WEBINAR

Friday

**May 27, 2022**

**2 pm to 3 pm**

## TO REGISTER:

**Scan the QR code with your phone or device, or  
Visit [redeemerhealth.org](https://redeemerhealth.org), or Call 800-818-4747**

**This is a virtual ZOOM presentation followed by a question and answer period. If you are unable to attend, please register and we will send you a recording of the presentation.**
