

MAMMOGRAM

Take time to take care of you

One in eight women will be diagnosed with breast cancer over the course of their lifetime. But with regular mammograms, breast cancer can be caught early – before it can be physically felt – providing valuable time to start treatment.

A photograph of an older man with grey hair, wearing a blue hoodie, crawling on a grassy lawn. Two young children are sitting on his back. The child on the left is wearing a pink puffer jacket and a white knit hat, looking up with an open mouth. The child on the right is wearing a red puffer jacket and a white knit hat with a flower, looking down. The background is a blurred residential street with parked cars.
